*Claim Rejections - 35 USC § 103*

1. Claims 1,5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grey et al (5,397,338).

The method steps of the above claims are considered to follow obviously from the teachings of the Grey patent. Figure 4 shows biphasic pulses, and columns 10-12 teach the placement of the electrodes onto the patient. Fibromyalgia is considered to be analogous to the conditions mentioned in Grey. Also, col. 10:15 teaches deep penetration of tissue. Further, the term 'sandwiching' is considered to be obvious over the teachings of placing the electrodes on both sides of the patient's joint, thereby 'sandwiching' the tissue between the electrodes.

*Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-11 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,745,078.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present application are considered to be an obvious broadening of the claims of the parent patent.
